

Journaling

Across the Federation, we are further developing our communication, language and literacy through mathematical journaling.

Math's journals are a way of learners recording their methods, explanations and ideas for solving maths problems and learning mathematical concepts so they can remember what they have learned.

It is a tool that helps learners explore ideas, develop their mathematical language and deepen their understanding which can then be used to teach other what they know

Children take ownership of their learning. Learners are not just performing tasks, they are reflecting on and recording their own understanding of the task.

Key Principles
